

Role: CTO

Employment Type: Full-time

Location: Remote

About TLNT:

TLNT is the ultimate co-creation platform, helping our partners to harness the power of creators in all corners of the world.

With over 1M creators, 2.5M social followers, 4M members and a client list including major brands, media owners and agencies, this is a truly unique opportunity to join a pioneering global company at an exciting scale-up stage.

Our Website: www.tlnt.holdings

The Role:

Being a figurehead for the TLNT Technology & Product department, you will oversee the management and implementation of applications and system platforms across the organisation. Working closely with the CEO, you will drive the established near-term and long-term strategies and project priorities across the department, whilst being able to confidently communicate with top-level external stakeholders.

Responsibilities:

- Conduct strategic and tactical-level planning in partnership with peers in IT to develop technical roadmap, and ensure delivery of supportable technology solutions that meet business needs.
- Oversee team to ensure the design and implementation of enterprise and departmental business applications resulting in solid ROI for the company.
- Ensure cost-effective design, development, integration, implementation, testing, and maintenance of new services and systems
- Lead system selection process, including business case development, vendor/platform evaluation, contract negotiation and vendor management
- Continue to keep abreast of new technology opportunities by researching, analyzing and interpreting industry data, technology trends, technical procedures, and/or governmental regulations.

- Provide exceptional communication between internal teams as well as external clients/contacts, often across multiple time zones

We'd love to hear from you if you have...

- Direct experience managing complex budgets in excess of \$500k+ direct and indirect costs
- Prior experience with Scala, Ruby on Rails, React, AWS and other related applications
- Strong knowledge and understanding of social network operations and/or multi-site interconnectivity
- Significant experience in hands-on technology delivery roles with an emphasis on infrastructure and digital services
- Demonstrable success in implementing new business applications with complex technology integration and business process change on time, on budget, and with high stakeholder satisfaction
- The ability to assemble diverse, multi-disciplinary teams and produce excellent results for our stakeholders and client base
- Leadership experience in Agile environments/methodologies (e.g. storymapping, sprint planning, product backlog grooming, etc)
- Substantial experience leading, directing and controlling a complex, highly technical operation and associated IT organization
- A cooperative, open-minded and solutions-focussed approach

Incentives:

- Competitive salary
- Future participation in an employee share option scheme, currently being established

Next Steps:

- Submit your CV and cover letter to careers@talenthouse.com

Please note that due to a high number of applications, if you do not hear back from us within two weeks your application has not been successful
