

Role: (Senior) Front-end Developer in React JS (w/m/x)

Employment Type: Employee

Location: Remote

About Sponsokit:

At Sponsokit, we make Influencer marketing smart, easy and effective. Sponsokit is the data-driven software that marketers use to manage their influencer marketing from A to Z and sponsor influencers efficiently.

We are looking for a self-motivated individual to join our team and play a major role in building the product.

Our ideal hire is someone who wants to learn and grow with us, rather than someone who checks all the boxes.

If you don't meet 100% of the criteria but you believe in our company vision and want to be part of an open-minded and multicultural team, please apply.

Tasks

- You'll design a completely new product in the field of Influencer Marketing
- You'll will work directly with our Product and Tech leads in converting user requirements into technical specifications
- You'll work directly with stakeholders to solve internal and external problems.
- You'll use the latest technology stack to code, deploy and review your work.
- You'll learn how to improve the user experience and how to become an expert in software development.

Requirements

- At least 3 years of production experience in building front end applications
- Proficiency with React, Node.js, JavaScript, HTML, CSS
- Experience with integrating REST Apis
- Interest in UI/UX is a plus
- Good written and spoken skills in English
- Team player with strong self motivation and willingness to learn
- Experience working in agile teams and scrum is a plus

Benefits

- Work directly with the founding team and in a open environment with flat hierarchies
- Rapidly growing startup with huge potential for personal & career growth
- Remote friendly with flexible working hours
- Modern and state of the art technology stack
- Have a direct and visible impact on the growth and revenue of the company.
- An international team which will grow exponentially within the next few months.
